Subject: Span recognized as Microsoft Partner of the Year across four markets

- other non-regulated information –

Span has been named as the winner of 2026 Microsoft Partner of the Year Award. For the first time, it has received the award in four markets simultaneously: Croatia, Slovenia, Ukraine and Kazakhstan. The company has been honored among the global field of top Microsoft partners for demonstrating excellence in innovation and the implementation of customer solutions based on Microsoft technologies.

“These recognitions confirm Span’s technological expertise, but above all, the value our teams create for customers every day by using Microsoft technologies. We are especially pleased to be recognized once again in Croatia, Slovenia and Ukraine, while the recognition in Kazakhstan is particularly meaningful to us, as it comes from a market where we have only recently begun building our business. It is an important confirmation that we can successfully bring the knowledge and experience we have built over the years to new markets as well,” said Mihaela Trbojević, Member of the Management Board at Span responsible for managing products and services.

The Microsoft Partner of the Year Award recognizes companies that have demonstrated excellence in developing and implementing innovative AI solutions based on Microsoft Cloud technologies. This year’s winners and finalists were selected from more than 4,500 nominations submitted worldwide across a diverse range of categories. Span was recognized for providing outstanding solutions and services for each of the awarded markets.

“Congratulations to the winners and finalists of the 2026 Microsoft Partner of the Year Awards”, said Nicole Dezen, Chief Partner Officer and Corporate Vice President at Microsoft. “This year’s honorees are harnessing the power of Microsoft Cloud and AI to deliver transformative solutions, accelerate customer success, and expand what’s possible. Their ingenuity and impact inspire us, demonstrating what can be achieved when bold vision and technology come together to empower organizations around the world.”
