What are the key risks that are specific to the issuer?

The following are the most material risk factors specific to the **issuer** at the time of creation of this **summary**:

- Because the **issuer** hedges most of its pricing and market risks with other financial institutions, these institutions may request additional collateral from the **issuer** in the event of a significant movement in the financial market, which would result in a substantial burden on the refinancing activities of the **issuer**.
- Due to the concentration of the **issuer's** funds with the significant counterparties Raiffeisen Bank International AG and Raiffeisenlandesbank Oberösterreich AG, you will be exposed to the credit and funding risk of these significant counterparties.
- If the certificate business is in any way restricted or hindered, e.g. by product interventions or reputational damages to the certificate market, the **issuer's** ability to create profit and cover all its operating costs could be reduced up to a point, where its solvency is significantly affected.
- If the distribution of **securities** within the Raiffeisen banking group Austria or Raiffeisen Bank International's network banks in Central Eastern Europe is in any way restricted or hindered, e.g. due to severe reputational damages to (parts of) the group or the brand "Raiffeisen" as a whole, the **issuer's** ability to create profit and cover all its operating costs could be reduced up to a point, where its solvency is significantly affected.

Key information on the securities

What are the main features of the securities?

Classification and rights

The **securities** are identified by the ISIN AT0000A30KX3 and governed by Austrian law. They will be represented by a permanent modifiable global note, i.e. no definitive securities in physical form will be issued. The respective holder of the **securities** is entitled to receive any amount due from the **issuer** (bearer securities). The **issuer's** obligations under the **securities** constitute unsecured and unsubordinated obligations of the **issuer** ranking equally with all unsecured and unsubordinated obligations of the **issuer**, save for such obligations as may be preferred by mandatory provisions of law. The **securities** do not possess a nominal value and no more than 309,831 units of the **securities** will be issued. The initial issue of the **securities** will take place on 28 September 2022 at an **issue price** of EUR 19.8509.

The **securities** are Turbo Long Certificates. Their EUSIPA classification is 2210. The **securities** provide you a variable redemption at the end of the term of the **securities**, and the possibility of an early redemption prior to the regular end of term. After such early redemption you will not receive any further payments. Redemption payments will be in EUR. The **securities** are designed for an unlimited, leveraged participation in the performance of the **underlying** for a short investment period and not necessarily until the end of the term of the **securities**. As the **securities** are leveraged, their performance will be, in general, a multiple of the performance of the **underlying**: small gains of the **underlying** will lead to high gains of the **securities**, however small losses of the **underlying** will lead to high losses of the **securities**, up to a total loss. If the **underlying** touches or falls below the **barrier**, the **issuer** will terminate the **securities** and you will receive only the residual value of the **securities**, which is presumably very small or even zero.

Please note: The terms and conditions of the **securities** grant the **issuer** the right upon certain extraordinary events (e.g. market disruptions, capital measures relating to the **underlying**, legislative changes) to either (i) adjust the terms of the **securities** or (ii) early redeem the **securities** at the then prevailing fair market value. What you receive in such case will differ from the descriptions in this **summary** and may even include a total loss of the invested capital.

For further details about the **securities** see the following sections.

Redemption

Please note: the **issuer** has not yet determined the **final valuation date** and **maturity date** of the **securities**, i.e. the end of term of the **securities** is not yet fixed. However, the **issuer** has the right to determine those dates.

The redemption of the **securities** is variable. You will receive either (i) an early redemption before the **maturity date** if certain events occur or (ii) a regular redemption on the **maturity date**. What you receive depends on (i) certain prices of the **underlying** on given dates and (ii) certain parameters of the **securities**. The **securities** refer as **underlying** for the determination of redemption to the fund shares of "UI Petrus Advisers Special Situation Fund UCITS - I" in EUR. The international securities identification number (ISIN) of the **underlying** is LU1214677046.

The following tables contain the most relevant information necessary for the determination of redemption.

Dates	
Initial valuation date	28 September 2022
Final valuation date	Not yet determined.

Maturity date	Not yet determined.
Barrier observation period	Starting on the first trading day after the initial valuation date and ending on the final valuation date .

Parameters	
Barrier ^{ADJ}	EUR 98.2620
Strike ^{ADJ}	EUR 89.3291
Financing rate	“€STR” as calculated and published by “European Central Bank”.
Financing rate margin	2.35%, whereby the issuer may change such margin within the range of 0% and 4.7%.
Multiplier	1.0
Product currency	Euro “EUR”
Underlying prices	
Initial reference price	EUR 109.18

Final reference price	The net asset value of the underlying for the final valuation date .
Barrier reference price	The net asset value of the underlying .
Underlying for redemption	
Underlying currency	Euro “EUR”
Fund shares	UI Petrus Advisers Special Situation Fund UCITS - I
ISIN	LU1214677046

^{ADJ} The parameter is subject to the below-mentioned adjustments during the term of the **securities**.

Barrier event

The redemption depends, among others, on the occurrence or non-occurrence of a **barrier event**. A **barrier event** has occurred if any **barrier reference price** during the **barrier observation period** was less than or equal to the **barrier**.

Continuous adjustments during the term

On every trading and business day, the **strike** and **barrier** are adjusted to take into account the financing costs of the **securities**. The financing costs depend on the **strike**, the **financing rate** and the **financing rate margin**, and cover interest incurred on additional capital provided by the **issuer**, which is necessary to implement the leverage effect of the **securities**. In general, such adjustment will reduce the value of the **securities**.

Early redemption prior to the regular end of term

As soon as a **barrier event** occurs, the **securities** are terminated. Within a predetermined period of time the **issuer** will determine the residual value of the **securities**. **You should expect such residual value to be very close or even equal to zero**. You will receive the residual value as final payment under the **securities** five business days after its determination. Except for the payment of the residual value, you will receive neither any further payments nor any compensation for such early redemption.

Redemption at the end of term

If the **securities** have not been early redeemed, you will receive the **redemption amount** on the **maturity date**. In order to determine the **redemption amount**, the **issuer** will at first determine a cash amount as the difference between (i) the **final reference price** and (ii) the **strike**. Your redemption will be such cash amount multiplied by the **multiplier**.

Where will the securities be traded?

At the time of creation of this **summary**, the **issuer** has no intentions to apply for trading of the **securities** on any regulated market, third country market or multilateral trading facility.

The **issuer** reserves the right to apply for trading of the **securities** on one or more regulated markets, third country markets or multilateral trading facilities.

Prices of the **securities** will be quoted by the **issuer** as amount per one unit (unit quotation).

What are the key risks that are specific to the securities?

The following are the most material risk factors specific to the **securities** at the time of creation of this **summary**:

Risks due to the particular structuring of the securities

- If the relevant price of the **underlying** has developed unfavourably, a total loss of the invested capital is possible. Due to a leverage effect, this risk is significantly increased. Unfavourable developments of the **underlying** include e.g. the fall of the **underlying**.

Risks due to certain features of the securities

- You may suffer a substantial loss due to an unfavourable determination of the **maturity date** by the **issuer**; even a total loss of the invested capital is possible.

Risks originating from the type of the underlying

- As the value of a fund is derived from the fund components, the risk of the fund as a whole contains the risk of all the fund components.
- Every adjustment of the fund composition by the fund manager – or even its omission – may be detrimental to the fund shares and thereby to the **securities**.

Risks due to the link to an underlying, but independent from the type of the underlying

- The traded volume of the **underlying** may become so low, that the market value of the **securities** is adversely affected or the **securities** are redeemed early at a price unfavourable to you.
- The **issuer** may perform trading activities directly or indirectly affecting the **underlying**, which may negatively influence the market price of the **underlying**.
- Unforeseen **underlying**-related events may require decisions by the **issuer** which – in retrospect – might prove unfavourable for you.

- Due to decisions or actions of the provider, administrator or issuer of the **underlying**, or the application, adoption or change of any applicable law or regulation, the **underlying** may become restricted or unavailable, which may result in unfavourable adjustments of the **underlying** and the redemption.
- Any trading in the **underlying** by the **issuer** is subject to potential conflicts of interest if the **issuer** is not fully hedged against the pricing risk of the **securities**.

Risks that are independent from the **underlying**, the **issuer** and the particular structuring of the **securities**

- The **issuer** has the right to delay an early redemption after the occurrence of an extraordinary event for up to six months, whereby any such delay or its omission may have a negative impact on the value of the **securities**.
- The development or liquidity of any trading market for any particular series of **securities** is uncertain, and therefore you bear the risk that you will not be able to sell your **securities** prior to their maturity at all or at fair prices.

Key information on the offer of securities to the public and/or the admission to trading on a regulated market

Under which conditions and timetable can I invest in this security?

Starting on the **issue date**, you may purchase the **securities** through a financial intermediary from the **issuer**. The price at which you may purchase the **securities** will be provided by the **issuer** and will be continuously adjusted by the **issuer** in order to reflect the current market situation. See the section “Where will the securities be traded?” above for information about the trading venues the **issuer** intends to apply for trading of the **securities** on.

Investment details	
Issue date	28 September 2022
Issue price	EUR 19.8509
Min. tradable units	One unit

The last day on which you may purchase the **securities** will be the **final valuation date** (see the section “Redemption” above), whereby the **issuer** may decide to end the offer earlier.

Please note: The offer, sale, delivery or transfer of the **securities** may be restricted by laws, regulations or other legal provisions.

What are the costs associated with the securities?

The table on the right shows the costs associated with the **securities** as estimated by the **issuer** at the time of creation of this **summary**.

Associated costs	
One-off entry costs	EUR 0.01
One-off exit costs during the term	EUR 0.01
One-off exit costs at the end of the term	None
Ongoing costs (aggregated over one year)	None

Please note the following regarding the costs listed in the table:

- All costs are included in the **issue price** or the quoted price of the **securities**, respectively. They refer to one unit of the **securities**.
- One-off entry costs are incurred at the moment the **securities** are subscribed or purchased, respectively.
- One-off exit costs during the term are incurred at the moment the **securities** are sold or exercised prior to maturity.
- One-off exit costs at the end of the term are incurred when the **securities** are redeemed.
- Ongoing costs are incurred continuously while the **securities** are held.
- During the term of the **securities**, the actual costs may be different compared to the costs presented in the table, e.g. due to varying premiums and discounts included in the quoted prices of the **securities**.
- When negative exit costs are incurred, they will compensate parts of previously incurred entry costs. You should expect those costs to tend toward zero as the remaining term of the **securities** becomes shorter.

Any offeror of the **securities** may charge further expenses to you. Such expenses will be determined between the offeror and you.

Why is this prospectus being produced?

The **issuer's** interest in the offering of the **securities** is to generate profits from parts of entry and exit costs of the **securities** (see the section “What are the costs associated with the securities?” above for information about costs). The net amounts of the proceeds per unit of the **securities** will be the **issue price** less any issue costs. The **issuer** has estimated its issuance costs for this series of **securities** to be around EUR 200.00.

The net proceeds from the issue of the **securities** may be used by the **issuer** for general corporate purposes.

Material conflicts of interest

The following activities by the **issuer** entail potential conflicts of interest as they may influence the market price of the **underlying** and thereby also the market value of the **securities**:

- The **issuer** may acquire non-public information with respect to the **underlying** which may be material for the performance or valuation of the **securities**, and the **issuer** does not undertake to disclose any such information to you.
- The **issuer** usually performs trading activities in the **underlying**, either (i) for hedging purposes with regard to the **securities** or (ii) for the **issuer's** proprietary and managed accounts, or (iii) when executing client orders. If the **issuer** is not (anymore) fully hedged against the pricing risk of the **securities**, any impact on the market value of the **securities** unfavourable to you will result in a favourable change in the economic situation of the **issuer**, and vice versa.
